

Directions

Sun rises in the EAST and sets in the WEST

$$D = a\sqrt{2}$$

1. Ross started walking from his home in search of Rachel. He went 30m in the East, then he turned right and went 20m. After this he turned left after going 30m he found a forest. He searched in the forest, but didn't find her. From there he went 100m to his north and reached the bank of a river. In which direction from his home is he now?

- A. North B. East ☒ C. North-East D. South-West

which is wrong. North remains same no matter what.

(or any direction)

5. Tom started chasing Jerry from the dining table, ran behind him for 10m towards South-West, from there 2m towards the East, then 10m towards North, and then 2m towards East and finally he ran for 7m till the door in the North and caught Jerry. In which direction is the dining table with respect to the door?

- A. North-West B. West ☒ C. East D. South-East

DT with respect to Door means east not west

I marked west, so remember in which respect it's asked with.

9. The time piece in Dumbledore's home is kept in such a way that the hour hand points towards North at 9:00 in the morning.

- i) In which direction will the minute hand point at 6:15 in the next morning if the position of the clock is unchanged?
A. North B. West ☒ C. East D. South

- ii) In which directions will the minute hand and hour hand respectively point at 10:30 a.m.?
A. West, North-West ☒
B. West, North-East ☒
C. North-East, West ☒
D. North-West, East ☒

10. If South-West becomes South-East, West becomes South and

- i) _____ becomes East.
A. West B. North ☒ C. South D. North-West
ii) North-East becomes _____.
A. South-West B. North C. East ☒ D. North-West

(They are rotating 90°)
